

Homework 1

Introduction (50 points)

Due Date: Monday Jan 25 at 11:59 pm

Instruction:

- Please type in your answers in the word document and submit it online.
- Please do not submit PDF files or image formats! the TAs are going to give you feedback in your word document.
- This HW is an individual assignment but the future ones are all group work.
- Late homework assignments will not be accepted under any circumstances.

Question 1 What project(s) are you working on right now? Tell me a little about the data set (at least the name of the variables) and if you are willing to work on this data set for your term project!

Question 2 Is there any specific person in the class that you want to be in the same group with?

Of course, there is no right or wrong answer to these question. If you are not working on any projects, or you don't know anyone from the class, that's totally fine. Just let me know!
